ABOUT US

ABOUT HYPERGLANCE

HYPERGLANCE INC. provides a self-hosted, agentless multi-cloud FinOps management platform for U.S. federal agencies, defense organizations, and regulated enterprises. Operational since 2015, the platform unifies cloud inventory, architecture visualization, cost allocation, and security compliance across AWS, Azure, Google Cloud, and Kubernetes.

Hyperglance runs inside the customer’s environment, giving agencies greater control over deployment, data handling, access, and outbound connectivity. Teams can investigate cloud spend, identify and reduce waste, allocate costs, understand dependencies, and support post-ATO operational oversight.

CORE CAPABILITIES

WHAT WE DELIVER

Six capability areas spanning FinOps, inventory, deployment control, compliance, automation, and reporting.

0 1

CLOUD COST MANAGEMENT & FINOPS:

Analyze spend trends, anomaly detection, forecasting, and resource ownership to allocate budgets, assign chargeback, and identify potential waste across multi-cloud estates.

0 2

MULTI-CLOUD ASSET DISCOVERY:

Map cloud resources, dependencies, and complex architectures in real time across commercial, AWS GovCloud, and Azure Government.

0 3

POLICY AUTOMATION & REMEDIATION:

Leverage 50+ built-in automation options and custom workflows to alert teams, route tickets to ServiceNow and Jira, apply cost controls, and remediate compliance issues.

0 4

SECURITY & COMPLIANCE OVERSIGHT:

Continuously assess configurations against CIS, NIST SP 800-53, HIPAA, and AWS Well-Architected frameworks to surface findings, track changes, and support ongoing compliance oversight.

0 5

SELF-HOSTED AGENTLESS ARCHITECTURE:

Deploy directly inside customer environments without managed resource agents, giving customers greater control over data location, access, connectivity, and platform operation.

0 6

REPORTING & AUDIT SUPPORT:

Produce cloud inventory, cost, architecture, security, and compliance reports to support reviews, audits, management reporting, and post-ATO operational monitoring.

DEVOPS INTEGRATION

WHY HYPERGLANCE

KEY DIFFERENTIATORS

- 01

RHEL/FIPS + STIG-HARDENING
Hardened deployment options designed for controlled federal environments, with suitability for DoD IL5 use cases subject to the agency's architecture, controls, and authorization process.
- 02

PROVEN FEDERAL MISSION TRACK RECORD:
Experienced in supporting defense and civilian requirements for the U.S. Air Force, FBI, DARPA, and NASA.
- 03

SELF-HOSTED & CUSTOMER CONTROLLED:
Hyperglance runs inside the customer's environment, giving agencies greater control over deployment, cloud management data, user access, and outbound connectivity.
- 04

CONTEXT-AWARE GOVERNANCE & AUTOMATION:
Hyperglance helps teams investigate ownership, architecture, usage, and risk before applying cost or security recommendations. Automation can then support approved workflows and repeatable remediation.

MISSION PROOF

PAST PERFORMANCE

FBI

Self-hosted cloud inventory, architecture visualization, FinOps and cost analysis, security and compliance monitoring, and policy-driven automation.

DARPA

Self-hosted cloud inventory, architecture visualization, FinOps and cost analysis, security and compliance monitoring, and policy-driven automation.

U.S. Air Force

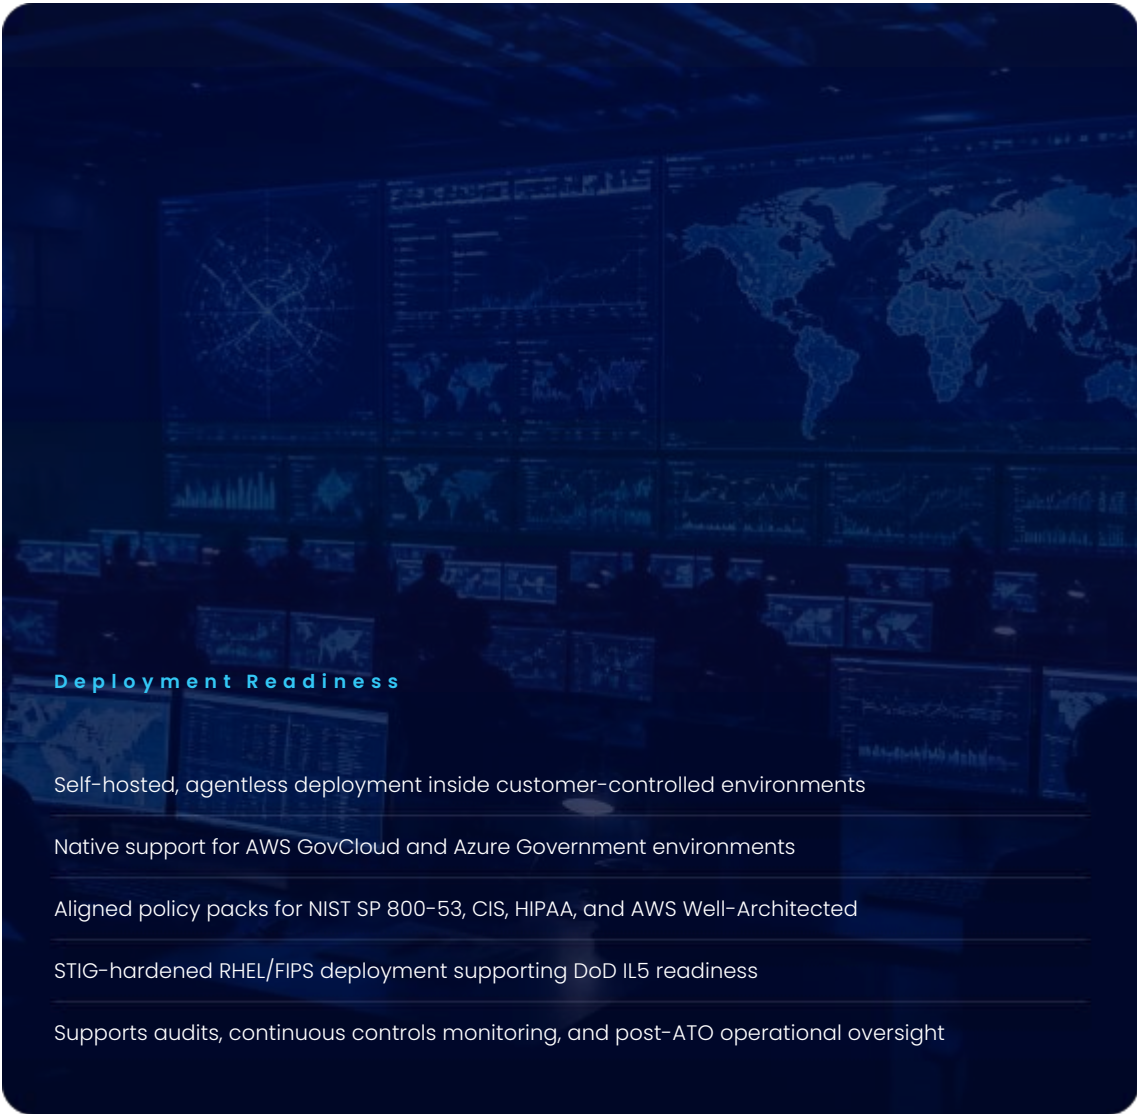

Self-hosted cloud inventory, architecture visualization, FinOps and cost analysis, security and compliance monitoring, and policy-driven automation.

NASA

Self-hosted cloud inventory, architecture visualization, FinOps and cost analysis, security and compliance monitoring, and policy-driven automation.

Contract-level detail and references are furnished directly to contracting officers on request during solicitation review.

Deployment Readiness

- Self-hosted, agentless deployment inside customer-controlled environments
- Native support for AWS GovCloud and Azure Government environments
- Aligned policy packs for NIST SP 800-53, CIS, HIPAA, and AWS Well-Architected
- STIG-hardened RHEL/FIPS deployment supporting DoD IL5 readiness
- Supports audits, continuous controls monitoring, and post-ATO operational oversight

CLIENTS & PARTNERS

TRUSTED ACROSS GOVERNMENT & REGULATED ENTERPRISE

Defense, civilian, and global enterprise organizations run Hyperglance inside their own environments.

 U.S. AIR FORCE				 Home Office
